About Us

Company History

Since 2018

Mountain Taste is a Tanzanian food processing company specializing in the production and export of high-quality fruits and vegetables. Founded and led by **Deo Mbilinyi**, the company operates a state-of-the-art pack house and cold storage facility in the Southern Highlands of Tanzania, near the Malawi-Tanzania border. Our strategic location provides a logistical advantage for supplying fresh produce to regional and international markets, including South Africa.

Mountain Taste, we work closely with a network of smallholder farmers to ensure consistent supply and quality. Our facility is equipped with modern cold chain systems, maintaining freshness and extending the shelf life of our produce. We are locally certified and are in the final stages of obtaining Global GAP certification, demonstrating our commitment to international quality and safety standards.

Our Values

- Quality
- Sustainability
- Innovation
- Community

Vision & Mission

Vision

To be a leading provider of high-quality, sustainably sourced fruits and vegetables from Tanzania, delivering freshness and nutrition to regional and international markets while empowering smallholder farmers and promoting agricultural excellence.

Mission

- To process and supply premium-quality fruits and vegetables that meet international standards.
- To support and uplift smallholder farmers through fair trade, training, and sustainable agricultural practices.
- To leverage modern cold chain technology for freshness, efficiency, and food safety.
- To expand our market reach, especially in Africa, by offering competitive prices and reliable supply.
- To contribute to the economic growth of Tanzania's agricultural sector through innovation and sustainability.

Quality Maintenance

Cold Rooms

Our facility is equipped with well-organized storage shelves designed to keep fresh produce in optimal conditions before processing and packaging. The shelving system ensures proper air circulation, minimizes physical damage, and maintains hygiene standards for high-quality output.

Generators

To ensure uninterrupted operations, our facility is equipped with standby generators that provide reliable backup power. This guarantees consistent refrigeration, preventing temperature fluctuations that could affect product quality, especially during power outages..

Physical factors.

- ✓ Under this category, the three most important factors are time, moisture, and temperature. We normally use the FIFO
- ✓ method when moving our stock for observing quality that can be affected through long time of storage.

Biological factors.

- ✓ These factors include taking care of microorganisms, birds, rodents, and insects and to some extent humans' activities.

Chemical factors

by controlling the use of Pesticides and fungicide on grains.

Technical factors include

- ✓ all processes the grain must go through before and during storage. The technical factors that we observe are methods of harvesting, threshing, conveying¬ purity of grain, and storage conditions.

Hiring experts.

- ✓ We hire warehouse fumigation companies from time to time to conduct warehouse fumi– gation services

Overhead air vents and No holes or cracks:

- ✓ To provide the right amount of ventilation while protecting stored grains from the outside atmosphere.
- ✓ To prevent rodents and insects from having easy access to grains in the warehouse.

A good concrete base around the warehouse perimeter:

- ✓ The base forming the boundary around the warehouse is made by concrete to provide no hiding place for insects and rodents.
